TWINWALL®

THE STRONGEST HANDLEBAR IN THE WORLD

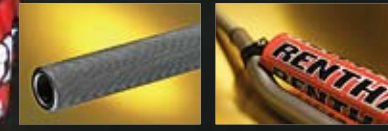

Renthal's revolutionary handlebar is a large diameter, 1 1/8" (28.6mm) handlebar which utilises two tubes, one within the other, borrowing principles from aircraft design to give the best combination of lightness, strength and safety. Since their release in 1998, the Twinwall has been the handlebar of choice for more professional race teams and has helped more riders win championships than any other handlebar in the world.

• Outer tube has extreme resistance to mechanical damage and is anodised to prevent corrosion

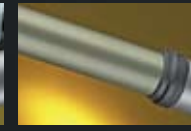

• Laser etched positioning grid

• Knurled grip area increases bonding between bars and grips

• Comes fitted with bar pad

• Inner tube is ultra high strength and is hard anodised to resist wear from twist grip and controls

• Renthal's copyrighted bonded lightweight single bolt clamp and brace system

• Comes fitted with bar pad

KEY FACTS

- Outer tube has extreme resistance to mechanical damage and is anodised to prevent corrosion
- Inner tube is ultra high strength and is hard anodised to resist wear from the throttle
- Renthal's copyrighted, bonded, lightweight, single bolt clamp and brace system increases strength and reduces weight
- Laser etched positioning grid offers easy set up
- Knurled left grip area for maximum grip adhesion
- Comes fitted with a newly developed injection moulded Renthal cross brace pad, for improved rider safety and increased grip on the cross brace.
- Renthal Twinwalls are used by more factory teams than any other including Factory Honda, Factory Kawasaki, Geico Powersports Honda, Pro-Circuit Kawasaki, Team Honda Martin Racing, Team Kawasaki Europe, Team Suzuki Europe, Factory KTM Europe, HRC Honda Japan, KHI Kawasaki Japan and Suzuki Japan plus many more
- Covered by US Pat. No. 6182528 & 5832785, GB Pat. No. 2321225, US Des. No. 431803

WORLD TITLES USA TITLES

7/8 BAR

THE ORIGINAL 7/8" (22.2MM) DIAMETER HANDLEBAR

The highest quality materials, engineering and craftsmanship have allowed Renthal 7/8" handlebars to win more championships than any other handlebar in the world. At our UK manufacturing facility we are constantly seeking more advanced materials and manufacturing methods which has resulted in a handlebar that is 20% stronger than any other 7/8" handlebar made. Renthal 7/8" handlebars made history in 2004 when Honda chose to fit them as original equipment to their MX range. Currently Honda and Kawasaki equip their MX range with Renthal 7/8" handlebars.

See Applications page 11

RENTHAL
THE #1 HANDLEBAR IN RACING

KEY FACTS

- An exclusive aluminium alloy make Renthal handlebars 20% stronger than any other 7/8" handlebar in the world
- Renthal's copyrighted, bonded, lightweight, single bolt clamp and brace system increases strength and reduces weight
- Laser etched positioning grid offers easy set up
- Knurled left grip area for maximum grip adhesion
- Comes fitted with a newly developed injection moulded Renthal cross brace pad, for improved rider safety and increased grip on the cross brace
- Available in a large variety of bends and colours to suit every rider's needs. From all current MX bikes, to minis and ATVs

• Laser etched positioning grid helps installation

• Shot peened surface finish to help prevent fatigue failure

• Knurled grip area increases bonding between bars and grips

• Renthal's copyrighted bonded lightweight single bolt, clamp and brace system

FATBAR®

1 1/8" BRACELESS HANDLEBAR

The Renthal Fatbar features a tapered outer wall resulting in an 1 1/8" (28.6mm) clamping diameter and 7/8" diameter at control ends. This profiled wall and brace-less design combines excellent strength with good flexibility. Kawasaki ATV, KTM and Suzuki have chosen the Renthal Fatbar as the ultimate brace-less handlebar and fit them as original equipment where a brace-less handlebar is preferred within their range.

• 1 1/8" large diameter clamping area

• Tapered outer wall to 7/8" increases strength and allows fitment of standard grips & controls

• Shot peened surface finish to help prevent fatigue failure

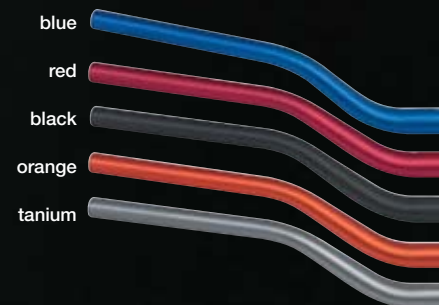

• Knurled grip area increases bonding between bars and grips

KEY FACTS

- 5.0 mm wall thickness at the bends and an exclusive aluminium alloy increase strength over regular brace less bars.
- Laser etched positioning grid offers easy set up
- Knurled left grip area for maximum grip adhesion
- Available in 12 different Bends and 5 colours
- Renthal handlebars have been chosen as original equipment by Kawasaki ATV, KTM and Suzuki
- Used by Team Honda Japan, Team Kawasaki Japan, Molson Kawasaki, Red Bull KTM Off-road and Team Suzuki Japan
- Licensed under US Patent Numbers 5117708 and 527552

See Applications page ii

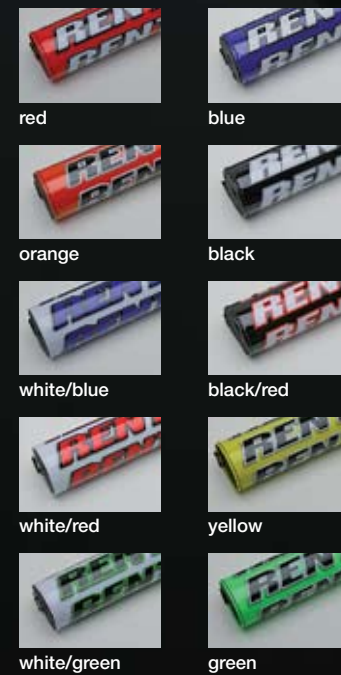

PADS

NEW INJECTION MOULDED FOAM

The Renthal bar pads feature an injection moulded foam which offers better impact protection and increases the life span of the foam. Improved fit on the cross-brace helps decrease movement during use.

SX PADS

See Applications page iii

FATBAR PADS

KEY FACTS

- A firmer density foam provides increased rider safety
- Extra thick back printed PVC cover provides great durability and long lasting good looks
- Velcro closure and slit foam offers easy removal and installation
- Features moulded Renthal logo in the ends
- Available in a wide range of colours and sizes for all applications

See Applications page iii

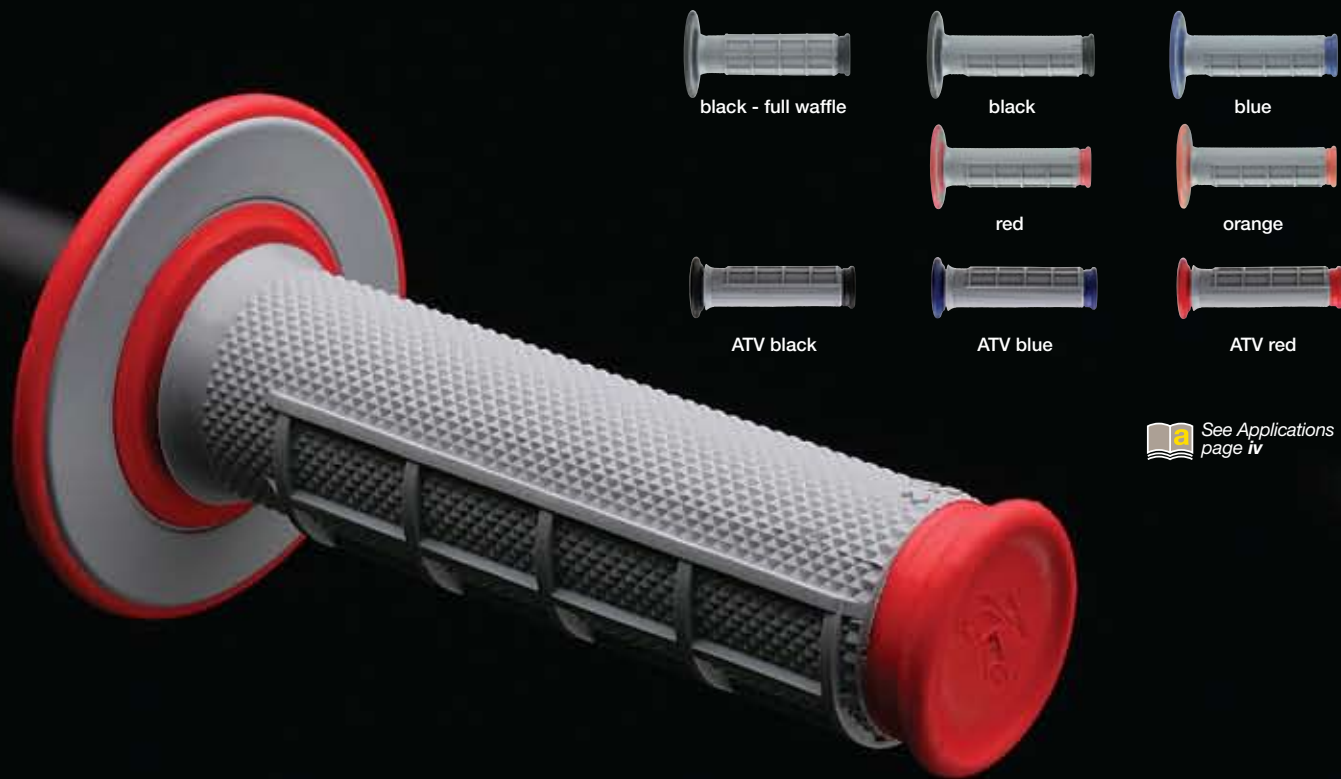

GRIPS

GRIP THE TECHNOLOGY™

DUAL COMPOUND - SOFT AND DURABLE

Renthal dual compound grips combine the durability of Renthal firm compound grips with the feel and vibration absorption qualities of Renthal soft grips. A firm compound is used for the flange, inner sleeve and outer end of the grip for maximum durability. A soft compound is used for the outer layer of the grip which is in direct contact with the palm, fingers and thumb for improved feel.

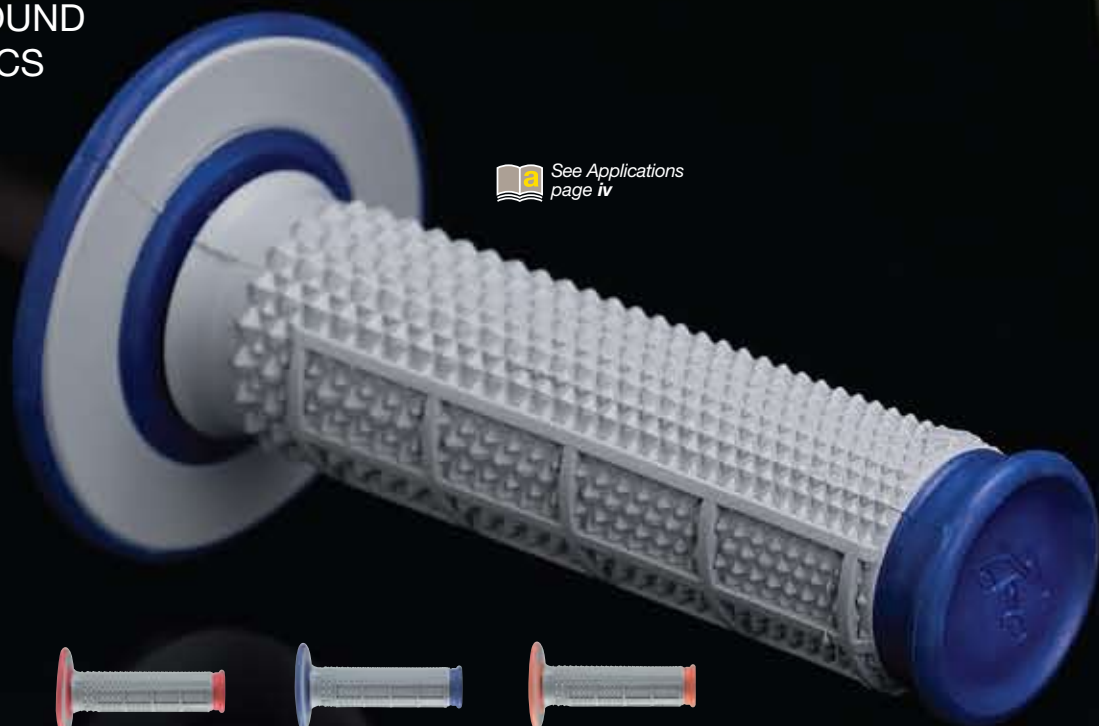

See Applications page iv

Renthal Tapered Dual Compound Grips are covered by the following Patent Nos: • US2004093979 • GB2395174

TAPERED DUAL COMPOUND ADVANCED ERGONOMICS

The Tapered Grip breaks new ground. In addition to all the benefits of our standard dual compound grip, it features an oversized thumb diameter which tapers down to regular size at the ends. This mirrors the contours of a closed fist to offer maximum comfort and reduced fatigue.

See Applications page iv

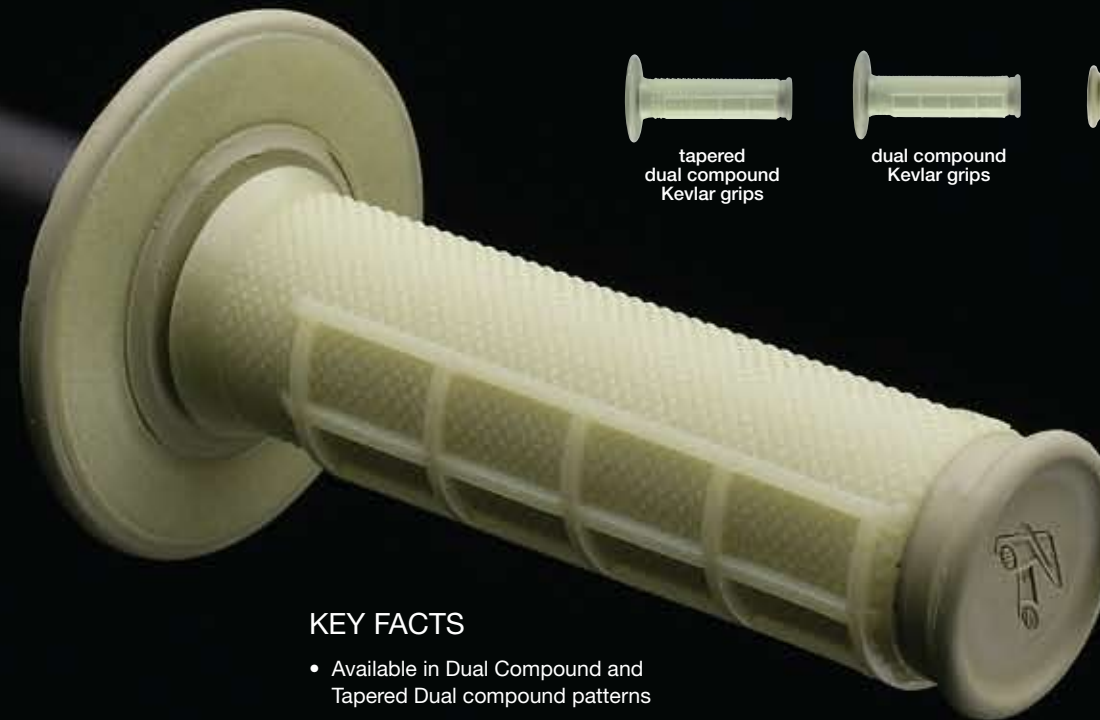

RENTHAL GRIPS WITH KEVLAR® BRAND RESIN THE MOST ADVANCED GRIP AVAILABLE

Renthal has developed a special reinforced grip with increased wear resistance. The grip has all the properties you would expect from a Renthal grip but with the life extending properties of KEVLAR® brand resin.

The base material contains millions of randomly aligned KEVLAR® brand resin particles. As the grip is used more particles are exposed, so the number of particles at the grip surface increases.

The result is revolutionary with the softest material we have ever produced which lasts three times longer than our current soft material.

See Applications page iv

KEY FACTS

- Available in Dual Compound and Tapered Dual compound patterns
- Renthal grips with DuPont™ Kevlar® brand resin are softer, tackier and longer lasting
- Available in tapered and standard dual compound patterns
- As used by many of the top professional racers around the world
- Patent pending

GRIPS

GRIP THE TECHNOLOGY™

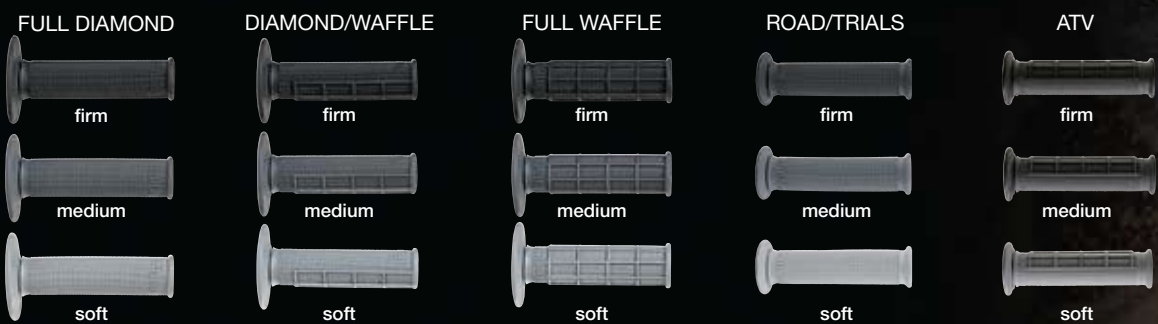

SINGLE COMPOUND

Renthal single compound grips are available in 3 different patterns. Each pattern is available in 3 advanced compounds. This means you can have the optimum combination of strength, tackiness and shock absorption to suit every riding condition and individual style.

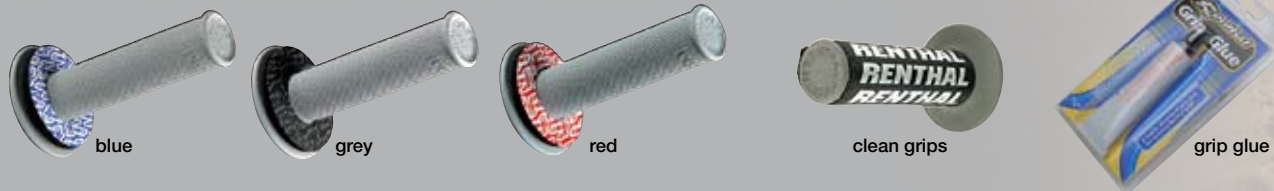

See Applications page iv

GRIP ACCESSORIES

See Applications page iv

GRIP DONUTZ

INTELLILEVER™

THE FIRST TRULY UNBREAKABLE LEVER

In the event of a crash the Renthal Intellilever can move 90° upwards, 90° downwards and 90° forwards and all angles in between. It is the only lever on the market which has this ability and makes broken or bent levers a thing of the past. The spring and cable system can be adjusted to offer different levels of resistance on the lever and the adjustable reach allows each rider to personalise the fit.

Renthal has finished development on our unbreakable front brake lever to complement the clutch lever which was introduced for 2008. Manufactured using the same principles as our clutch lever, the Intellilever™ brake lever is able to pivot 90° both up and down as well as 90° forward and all angles in between in the event of a crash preventing the lever blade from breaking. The brake lever is used with the OE master cylinder and offers similar reach adjustment to the stock lever.

See Applications page iv

INTELLILEVER™

- CNC Machined from 6061 billet aluminium
- Hard anodised lever for increased joint longevity

- Oversized on the fly adjuster
- Adjustable reach for a personalised fit

KEY FACTS

- The Intellilever is the only lever to use a cable and spring system to offer a 270° range of movement
- CNC machined from 6082 T6 billet aluminium for maximum strength
- Hard anodised lever blade for increased joint life
- Oversized on the fly cable adjuster for ease of use
- Adjustable reach for personalised fit
- Also available in a four stroke version with an integrated hot start lever
- Will fit most cable operated clutch systems (except for electric start models)
- Covered under Patent US7201080B1

See Applications page iv

NEW FOR 09

KEY FACTS

- Machined from 6082 T-6 Billet aluminium
- Lever blade hard anodized for increased durability
- Each lever comes with an optional stiffer spring to allow for firmer dislocation
- Adjustable reach for a personalized fit
- Model specific fitments for a perfect fit on each bike
- Covered under patent #US7201080B1

RC-1 BRAKE PADS

SINTERED BRAKING TECHNOLOGY

Renthal RC-1 Works Brake Pads are a premium; high performance sintered metal brake pad with excellent wet and dry braking power. Designed specifically for motocross and off-road racing applications they are the first choice where maximum stopping power, progressive feel, no brake fade and quick bed in time are important considerations.

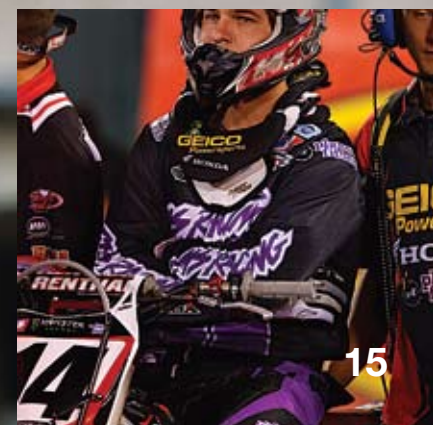

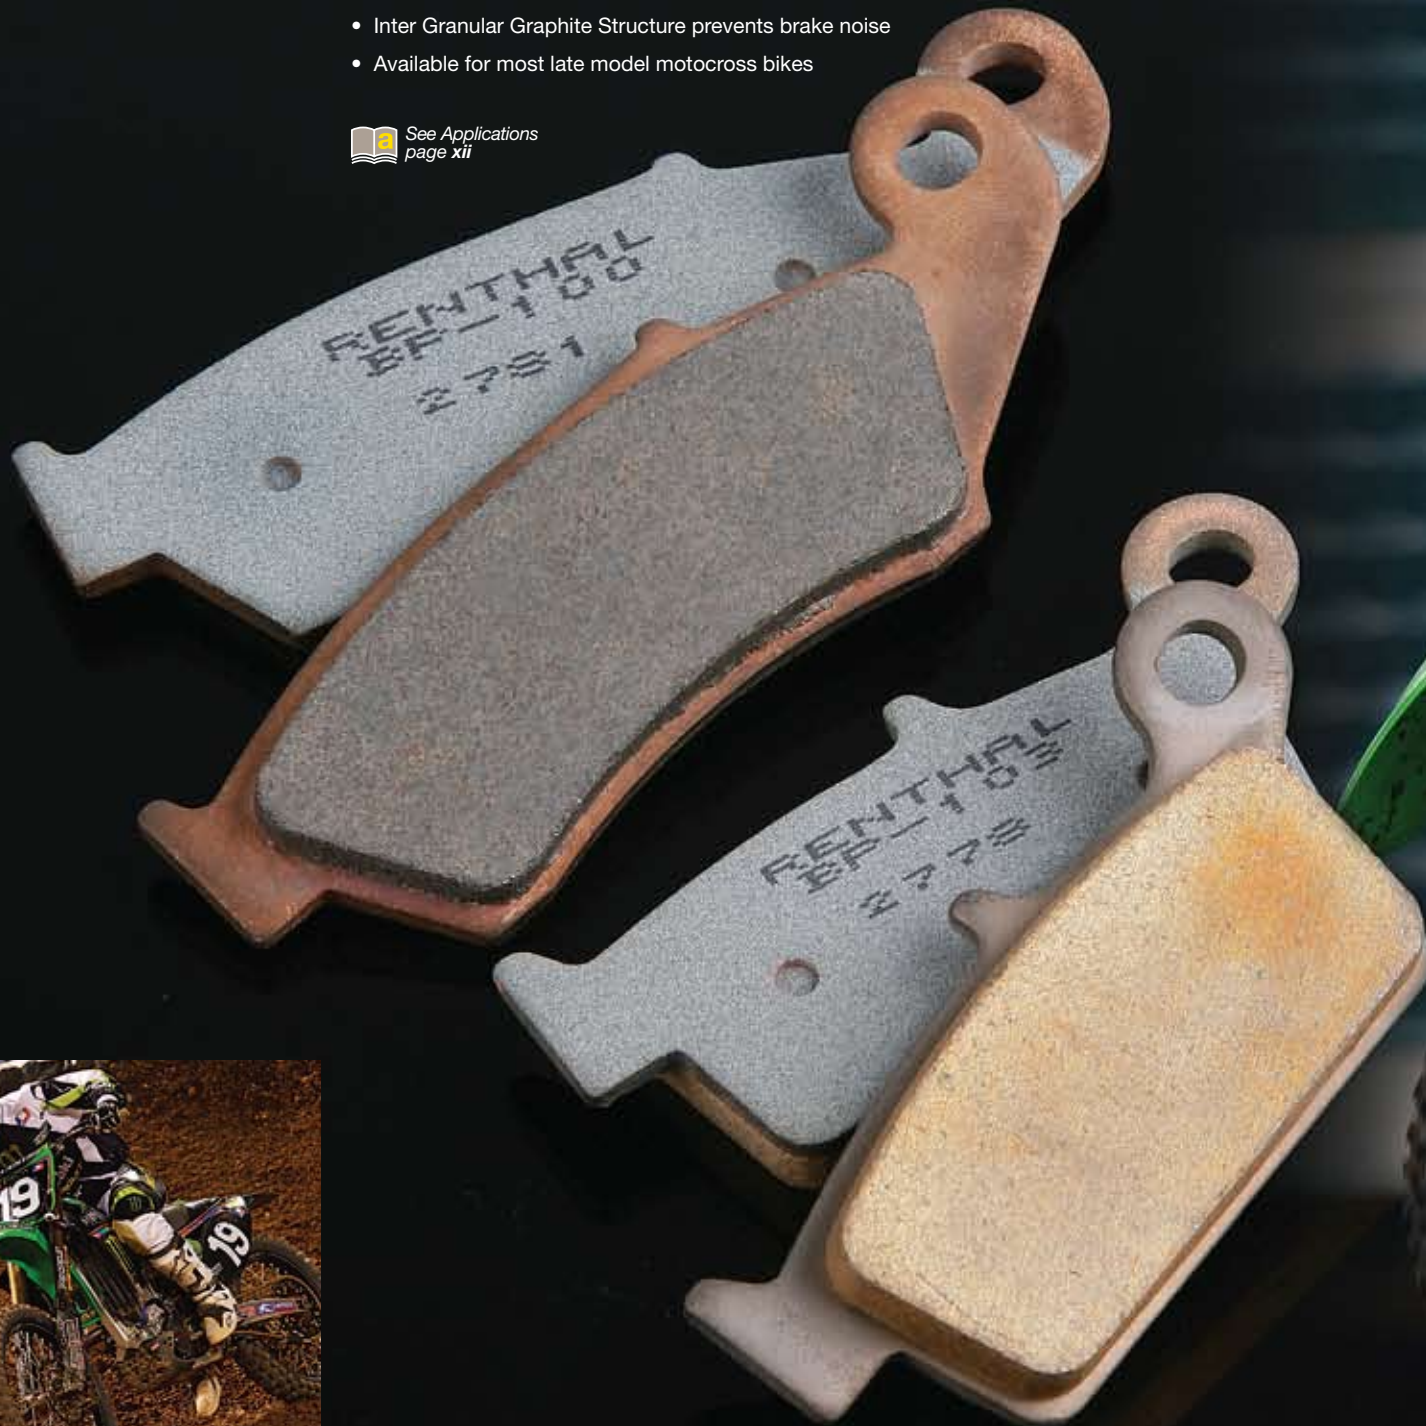

KEY FACTS

- A high performance sintered metal compound which eliminates brake fade
- Formulated for quick bed in time and immediate response
- High tech Ceramic Heat Shield reduces heating of the brake fluid
- Inter Granular Graphite Structure prevents brake noise
- Available for most late model motocross bikes

See Applications page xii

RC-1 WORKS BRAKE PADS

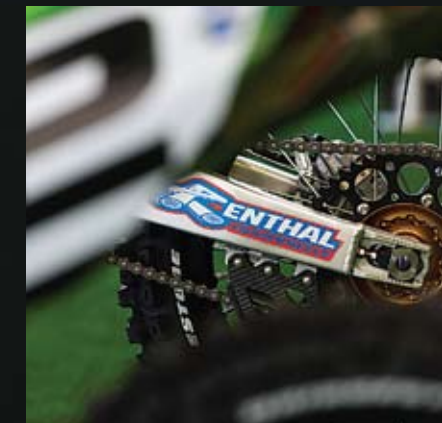

FRONT CHAINWHEELS

THE #1 CHAINWHEEL IN MOTOCROSS & SUPERCROSS

Renthal Ultralight™ Chainwheels are chosen by more Factory Motocross and Supercross teams than any other on the market. Case hardened and core refined 655M13 Nickel Chrome Molybdenum steel and precision CNC machined to extremely tight tolerances for maximum longevity. Computer aided Ultralight™ design minimises weight and allows maximum power transfer to the real wheel.

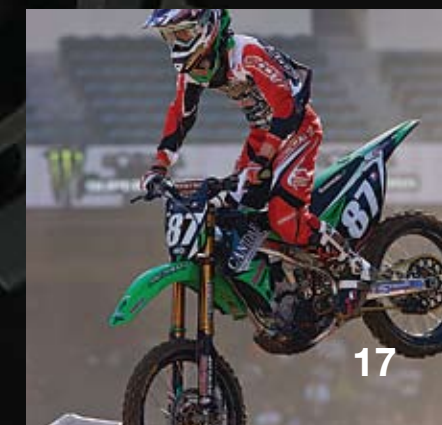

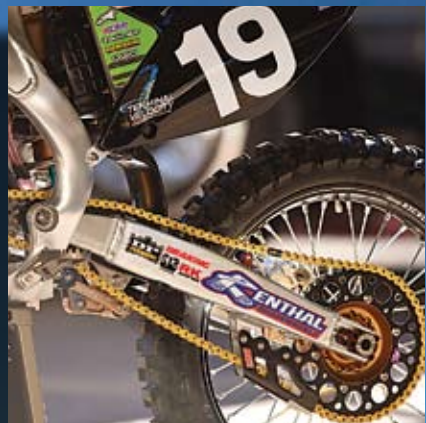

See Applications
page v

KEY FACTS

- Renthal chainwheels are used by more factory teams than any other including Factory Honda, Factory Kawasaki, Pro-circuit Kawasaki, Team Honda Martin Racing, Team Kawasaki Europe, Team Suzuki Europe, Factory KTM Europe, HRC Honda Japan, KHI Kawasaki Japan and Suzuki Japan plus many more
- Self cleaning mud grooves between each tooth help prevent dirt build up
- Certain models available in "Ultralight™" design to further reduce revolving unsprung weight for maximum power transfer

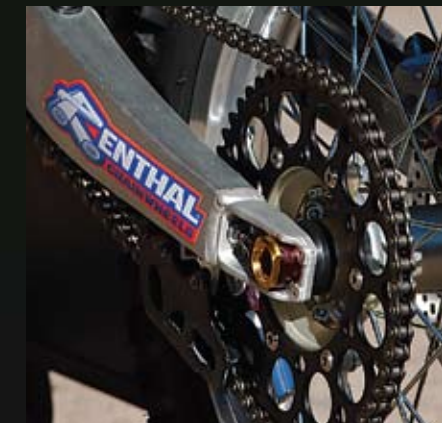

REAR CHAINWHEELS

THE #1 CHAINWHEEL IN MOTOCROSS & SUPERCROSS

Renthal Ultralight™ Chainwheels are chosen by more Factory Motocross and Supercross teams than any other brand on the market. Our rear chainwheels are CNC machined to offer the greatest concentricity and optimum tooth profile for increased life and durability. Through the CNC machining process, we are able to create an extremely lightweight rear chainwheel which reduces revolving unsprung weight and increases the power transfer to the rear wheel.

silver

black

red

orange

blue

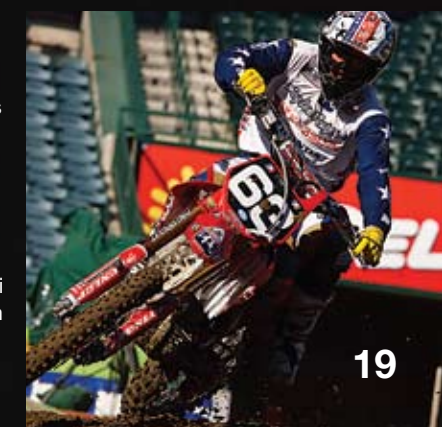

See Applications page v

KEY FACTS

- Renthal rear chainwheels are 66% lighter than a standard steel chainwheel
- Computer aided Ultralight™ design gives the ultimate combination of strength and lightness
- Specially enhanced high strength 7075 T6 aluminium alloy provides excellent longevity
- Self cleaning mud grooves prevent dirt build up and reduce chainwheel wear
- Precision CNC machined to extremely tight tolerances.
- Renthal chainwheels are used by more factory teams than any other including Factory Honda, Factory Kawasaki, Pro-circuit Kawasaki, Team Honda Martin Racing, Team Kawasaki Europe, Team Suzuki Europe, Factory KTM Europe, HRC Honda Japan, KHI Kawasaki Japan and Suzuki Japan plus many more

TWINRING™

STEEL AND ALUMINIUM COMPOSITE REAR CHAINWHEEL

Renthal's Twinring chainwheel is the longest lasting most durable chainwheel you can buy, developed over five years of extensive testing. The Renthal Twinring combines a specially enhanced 7075 T6 aluminium alloy centre and an ultra high strength electroless nickel coated steel outer ring. By combining these two materials we have created a chainwheel that is lighter than steel but more durable than the traditional all aluminium chainwheel. The unique flat face design keeps weight to a minimum and prevents fouling on the chain guide.

See Applications page xiii

KEY FACTS

- Inner ring is high strength, Ultralight™ 7075 T6 Aluminium
- Outer ring is electroless nickel coated steel for ultimate durability.
- The outer ring is expanded at 200 °C and then fitted over the inner. This interference fit combined with the wave pattern ensures a permanent bond for the life of the chainwheel
- The flat socket head screws add additional strength to the chainwheel during side impacts
- Self cleaning mud grooves prevent dirt build up and reduce chainwheel wear
- Available for popular dirt bikes with 520 chain in sizes 47 to 53
- Extensively tested by David Knight, KTM World Enduro Team and Team Honda Off-road
- Patent pending

MX/OFFROAD CHAINS

THE PERFECT MATCH FOR RENTHAL CHAINWHEELS

Renthal chain is only available in the highest grade possible. The best materials and manufacturing processes are used to offer the ultimate chain in each category, perfectly matched with Renthal chainwheels for maximum efficiency and longevity.

R1 WORKS CHAIN

A premium high strength 520 chain with excellent impact load resistance, designed specifically to withstand the stress found in off road applications. This chain is the choice where a combination of high strength, lightweight and maximum power transfer are important considerations

- Shot-peened alloy steel side plates for high tensile strength and maximum impact load resistance
- Chamfered inner links to reduce the chance of chain derailment
- Extended bushings to reduce friction between outer and inner link plates, maximising power output
- Chromised bearing pins for excellent wear resistance
- Gold colour side plates help prevent corrosion
- Most perfectly matched chain for Renthal chainwheels allowing maximum power transfer to the rear wheel

See Applications page xiv

R3-2 O-RING CHAIN

- Nitrile 'O' Rings extend chain life by retaining special vacuum injected grease inside the chain joint
- Shot-peened alloy steel side plates for high tensile strength and maximum impact load resistance
- High carbon alloy steel bearing pins for excellent resistance to wear
- Gold coloured side plates and copper coloured rollers help prevent corrosion
- Pre stretched to enhance performance of the chain.

R4 ATV CHAIN

- Patented z-ring seals dramatically increase the life of the chain
- Larger diameter pins manufactured from specially enhanced steel improve the resistance to shock loads
- A quad riveting process on each pin increases the tensile strength of the chain
- Thicker inner and outer plates increase the fatigue life of the chain

CHAINLUBE

See Applications page xiv

A FULLY SYNTHETIC NON-AEROSOL LUBRICANT

Renthal chain lube is a fully synthetic, non aerosol chain lube created to give outstanding wear properties and maximum power transfer.

KEY FACTS

- 100% Lubricant, zero propellant
- Specially formulated to penetrate all parts of the chain and thicken to have excellent anti-fling properties.
- Completely safe for all o-ring and standard chains

CLIP-ON HANDLEBARS

NEW FOR 09

Renthal clip-on handlebars are a premium race spec part developed with Kawasaki World Superbike Racing Team both. Machined from billet aluminium, each set comes complete with bar tubes made from the same 7010 aluminium as Renthal's legendary motocross handlebars. The bar tubes and the clamp are laser etched with a positioning grid for precise handlebar set up.

KEY FACTS

- Fork Clamps machined from 7075 T-6 billet aluminium and anodised factory black
- Handlebar tubes machined from 7010 aluminium and hard anodised for increased wear resistance from controls
- Fork clamps feature laser etched positioning marks in the upper surface every 5mm
- Removable Nylon bar end inserts for protection of the grips
- Available in 50mm, 52mm and 53mm fork tube sizes to fit most current sport bike applications
- Replacement tubes are available separately
- Renthal clip-on handlebars are used by Kawasaki World Superbike Racing Team both

See Applications page iii

STREET HANDLEBARS

Renthal road handlebars are a 7/8" (22.2mm) diameter handlebar which utilise the same material and craftsmanship as our championship winning MX handlebars. For road use only, they come without a cross brace and are available in four generic bends so suit a wide range of motorcycles and riders.

KEY FACTS

- Laser etched positioning grid offers easy set up
- Knurled left grip area for maximum grip adhesion
- Available in a range of bends and colours
- Renthal road handlebars are chosen as original equipment by Honda

See Applications page iii

DUAL COMPOUND ROADGRIPS

Renthal dual compound grips combine the durability of Renthal firm compound grips with the feel and vibration absorption qualities of Renthal soft grips. A firm compound is used for the flange, inner sleeve and outer end of the grip for maximum durability. A soft compound is used for the outer layer of the grip which is in direct contact with the palm, fingers and thumb for improved feel.

NEW FOR 09

See Applications page iv

DUCATI CARRIER

The Renthal Ducati carrier is a direct bolt on replacement for the one piece OEM carrier/sprocket and allows for easy rear sprocket changes without removal of the rear wheel. In addition it is CNC machined from 6082T6 aluminium which is 66% lighter than the OEM Steel unit which reduces revolving un-sprung weight. When used in conjunction with the Renthal hard anodised chainwheel the weight saving is 1/2 Kg which will provide greater transfer of power to the rear wheel.

KEY FACTS

- When installing the Renthal Carrier you must use the matching Renthal rear chainwheel
- Utilizes the stock cush drive bushings
- Rear chainwheels must be purchased separately
- 1/2 Kg lighter than the OEM version
- Hard anodised for increased longevity
- CNC Machined from 6082 T6 aluminium

See Applications page xiv

NEW FOR 09

ROAD/ROAD RACE CHAINWHEELS

HARD ANODISED ALUMINIUM FOR INCREASED LONGEVITY

See Applications
page v

Renthal Ultralight™ road and road race chainwheels feature all the benefits of our regular aluminium rear chainwheels but with increased longevity. Hard anodising is an integral surface coating which significantly increases the hardness and wear resistance of the chainwheel surface.

KEY FACTS

- Hard anodised for increased longevity
- Computer aided Ultralight™ design gives the ultimate combination of strength and lightness
- Specially enhanced high strength 7075 T6 aluminium alloy provides excellent longevity
- Renthal rear chainwheels are 66% lighter than steel
- Precision CNC machined to extremely tight tolerances.
- Renthal chainwheels are used by Erion Honda, Airwaves Ducati, Kawasaki World Superbike Racing Team, Yamaha WSB Team and many more . . .

ROAD/ROAD RACE CHAIN

THE PERFECT MATCH FOR
RENTHAL CHAINWHEELS

Renthal's SRS Road and Road Race chain is a specially developed sealed ring chain utilizing Renthal's Self Regulating Seal (SRS) technology to increase the service life of the chain in road applications. The special SRS ring is pre-loaded during assembly creating a spring effect. As the chain wears, conventional o-rings and x-rings lose their seal, however the SRS ring has the ability to unload itself during use keeping a tighter seal against the side plates. This offers increased longevity as the specially formulated grease remains trapped around the critical pin and bushing area longer, while also keeping dirt, water and other contaminants out

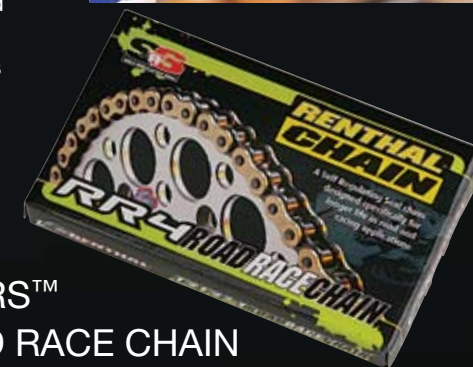

R4 SRS™ ROAD CHAIN

A premium high strength road chain, with excellent durability designed to replace your OE chain. Available in 520, 525 and 530.

- SRS ring technology enhances chain flexibility and offers smoother operation than standard o-ring chains
- All R4 SRS Road chains feature high alloy steel plates and pins, solid bushings and rollers, shot peened side plates for added strength and gold side plates
- Special quad riveting process and thicker outer plates increases overall strength
- Gold colour side plates help prevent corrosion
- Chains come pre-stretched from the factory so less adjustment is needed during initial break in

See Applications
page xiv

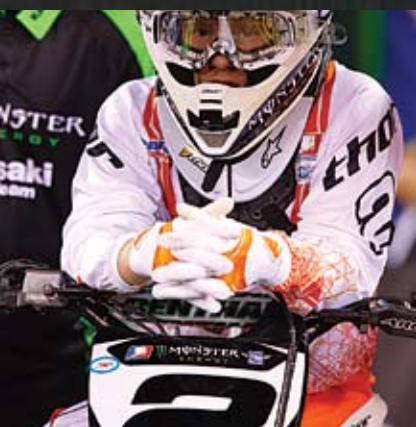

R4 SRS™ ROAD RACE CHAIN

The ultimate high strength chain designed for 520 conversions and racing applications.

- SRS ring technology enhances chain flexibility and offers smoother operation than standard o-ring chains
- All R4 SRS Road chains feature high strength alloy steel plates and pins, solid bushings and rollers, shot peened side plates for added strength and gold side plates
- Special quad riveting process and thicker outer plates increases overall strength
- Gold colour side plates help prevent corrosion
- Chains come pre-stretched from the factory so less adjustment is needed during initial break in
- As used by Airwaves Ducati
